## PREFACE

This bibliography consolidates and brings up to date the publication of June 1953 and its supplement of August 1955. It attempts to list material written by Economics Division staff members and published either by the Division or by other agencies. In order to avoid unnecessary repetition preliminary articles and reports have been omitted. Each item is listed only once, under the heading indicating its principal subject matter.

In making the individual listings certain principles have been adopted. The place of publication has been omitted; in the majority of cases it is Ottawa. The name of the issuing agency is included only if it is not the Economics Division. Reports of studies made jointly by the Economics Division and some other agency are listed as "In co-operation with ...". Items are arranged in chronological order within sections.

Out of print publications of the Economics Division are indicated by an asterisk. Other Economics Division items are available without charge from the Division while the supply lasts. Material issued by other agencies is not available from the Division unless indicated.

The bibliography was compiled by Helen I. Marquis.
